3 Position Slide Diverter Valve

For Immediate Release

Divert from one line to three, with patented valve design

Kansas City, KS -- Smoot, a division of Magnum Systems, is pleased to announce the release of the 3 Position Slide Diverter Valve to the Smoot family of equipment.

The 3 Position SDV features a unique sealing method, which uses regulated compressed air applied to the sealing rings, which results in an air tight seal between the inlet and outlet ports.

The 3 Position SDV's features include:

- Unique model design features minimal line deflection and full port flow for low pressure drop
- Pipe or tube sizes in 2 inch – 6 inch available
- Bi-directional (divert or converge)
- Air and dust tight
- Pressure or vacuum applications
- Carbon Steel (standard) or stainless steel product contact points

Smoot, a division of Magnum Systems, is a leader in pneumatic conveying systems and components. For over 45 years Smoot has provided customers with versatile, cost effective, pneumatic conveying equipment, and continues this trend today. For more information about Smoot, go to their website at www.smootco.com or call 1-800-748-7000.
