Innovative Robotic Bag Palletizing System

For Immediate Release

Taylor Products, Division of Magnum Systems, announces the release of the TRP3000 Robotic Palletizing System. The TRP3000 is the latest in innovation from Taylor Products. This robotic palletizing system offers the finest in robotic technology through Taylor Product's unique relationship with FANUC Robotics. Taylor Products has gained a reputation for innovative weighing and packaging equipment and FANUC is the world's largest robotics producer who has built a reputation for cutting edge technology. The result is a palletizing system that has been engineered for precision high-speed/high-payload operation, user-friendly setup, and maximum reliability.

Robotic palletizing with speed and precision

- Direct labor savings and improved personnel scheduling and utilization
- Fastest cycle time and highest payload in robot class
- High performance motion yields fast cycle times and high throughput
- Flexibility to service multiple production lines
- Requires minimal programming and maintenance

Their approach is to combine standard products with custom engineered system components to produce complete, productive and efficient system. A system you can count on for uptime, accuracy and fast payback.

Taylor Products, a division of Magnum Systems, is a leader in material handling, weighing, and packaging equipment. For over 50 years Taylor Products has provided customers with versatile, cost effective, packaging equipment, and continues this trend

today. For more information about Taylor Products, go to Taylor Products website at www.taylorproducts.com or call 1-888-882-9567.
